AMAZING WHAT YOU CAN DO WITH GRASS

The grass paper we use for our Bloom concept has an uplifting, sustainable story to tell. Extremely energy-efficient to produce, it only requires two litres of water to produce one ton of pulp. Even better, the grass used is harvested locally from parks and other areas not competing with grass for animal feed.

ECO-CONSCIOUS PACKAGING IN ITS PUREST FORM

The modular Viking range meets the strong market demand for high-quality cardboard boxes with collapsible, flat-packed lids that stay securely shut and don't require folding. Crafted from 100% renewable resources, it offers a wide variety of easy-to-assemble and quick-to-fill options for just about any hot or cold foods. These are suitable for profile printing, which we are happy to organise.

A) Viking boxes are constructed with tapered edges, which makes them – unusually for cardboard boxes – resistant to leaks.

B) Viking ecoecho® boxes are made from FSC®-certified cardboard and plant-based PLA lamination.

C) The lids conveniently flip open with no folding required.

The Viking concept suits different budgets. The boxes and lids are available in basic and ecoecho® versions. See the full concept on pages 33 and 35.

RECYCLED MATERIAL STUNNING DESIGN

Polardeli boxes bring a fresh perspective to mindful packaging design. Ideal for delis, they protect chilled food while their transparent, recycled PET material makes it look delicious. Even better, they offer top-tier functionality and work with Duniform® sealing machines and lids.

DUNIFORM®

PROFESSIONAL IN-HOUSE PACKAGING MADE EASY

For over 40 years, the Duniform® concept has set the standard for simple, smart professional in-house sealable packaging. Over that time, it has helped to drive success for many hotels, restaurants, meal delivery service (MDS) companies, caterers and retailers. The concept has consistently grown in popularity and scale, but the idea it is built on – that good food deserves good packaging – remains the same.

EASY TO CARRY

Combining first-class portability and sustainability, Octabagasse boxes feature easy-to-grip edges. The result? They are easier to work with and dine from.

CRYSTAL CLEAR RPET LIDS

Made from 100% recycled plastic, the transparent RPET lids contrast elegantly with the bagasse and make your food look delicious.

NATURAL-LOOK BAGASSE LIDS

Does an opaque lid suit your concept better? Go for the bagasse lids which seamlessly match the bases and create an elegant eco-look.

SUPER-SECURE CLOSING

Both the RPET and bagasse lids shut securely to protect against spills and waste. The bagasse lids, in particular, incorporate wings and lock shut with a satisfying haptic click – a feature customers and staff are sure to appreciate.

STAND OUT WITH PERSONALISATION

Today's consumers want individual experiences. You can take advantage of our Customisation service to give your customers exactly that - and, in doing so, build your brand.

Our experienced team can help you do this with speed and efficiency. Specifically, they can emboss the 100% RPET lids and provide custom Stickers and Sleeves.

BioPak is a new Duni Group brand with a focus on mindful packaging designed with the circular economy in mind. Join us in making a positive change!

BioPak Paper Straws are FSC® certified, plastic-free and practical – an eco-conscious solution for consumers who prefer to use a straw. They meet the BfR XXXVI standard and are recyclable as paper packaging. Available in a range of sizes and colours in 3-ply premium grade board, they match perfectly with the Duni Table Top collection.

BIOPAK PAPER STRAWS

- Hygienic and food safe
- Meet the high requirements of BfR XXXVI standard
- Renewable FSC® material
- Tasteless
- Suitable for cold and alcoholic drinks

A CUP OF ART, PLEASE!

NEW

Introducing BioPak Art Series.
Change is in your hands!

BioPak
It doesn't cost the earth

#biocupartseries

Art Series are probably the most fashionable cups, telling sustainable stories with art on-the-go. The concept features environmentally themed artwork from European, Australian and New Zealand artists released every 8 weeks. Every box contains a mix of 3 beautiful, creative designs, helping create attention for your business on social media. Made of paper sourced from managed plantations, and with Ingeo™ lining, a plant-based bioplastic, our Art Series Cups are industrial compostable and designed with the circular economy in mind. Art Series Cups biodegrade in an industrial composting facility without creating any toxic residues.

BIOCUP ART SERIES COMPOSTABLE SINGLE WALL CUPS

- New artworks every eight weeks
- Made from plants, designed with the circular economy in mind
- Cups will create nutrient rich compost in industrial composting

Material: PAP/PLA max +100°C
CPLA max +100°C

SMARTER IN-HOUSE PACKAGING

Good food deserves good packaging. With this in mind, we developed our unique 'one-stop-shop' Duniform® concept. This combines sealing machines, trays, sealing films, transport solutions and service and support.

You simply choose the solution that's best for your business at any given time.

DUNIFORM®

DUNIFORM®

Even better, unlike off-the-shelf alternatives, Duniform® products are designed to work together. This means optimal convenience for you – and a great experience for your guests. Keep an eye out for exciting new packaging concepts in our Duniform® range.

PROFESSIONAL IN-HOUSE PACKAGING MADE EASY

Win over eco-conscious customers by using packaging that cares for the environment.

Get a top-quality sealing machine that suits your needs, whether you are a local deli or an industrial-scale HMR company.

Select a tray for frozen, chilled or warm food from a wide choice of formats and top-quality materials.

Customise your films to stand out and turn your packaging into a promotional tool.

Show your food at its best and ensure a leak-free, secure fit with crystal-clear films.

Extend the shelf-life of your food, make planning easier and minimise wasted ingredients.

Receive dedicated local support for the lifetime of your solution, covering technical service, expert guidance and even training.

Ensure your food arrives in tip-top condition and simplify delivery with thermo-bags and boxes, temperature control equipment and trolleys.

The Duniform® one-stop-shop concept has set the standard for simple, smart in-house packaging. Over time, it has helped to drive success for many leading hotels, restaurants, MSR companies, caterers, and retailers.

Unlike off-the-shelf solutions

Different to many alternatives, all Duniform® products are designed to work together. That means you get optimal convenience and your customers get a consistently great experience. What's more there are no complicated ordering hassles.

Tailored to your business needs

Another big advantage of the Duniform concept is the way it matches – and grows with – your business. With such a wide choice of machines, materials and trays available you can always get exactly the right solution for your needs.

Eco-conscious materials

The Duniform® concept includes many innovative, eco-conscious materials, such as bioplastic. These not only offer top-level performance and practicality; they also send an attractive message about your business to your customers.

A flexible finishing touch

The sealing films for Duniform® can be customised for an added personal touch. Now we even offer profile printed stickers & sleeves that enable you to promote your brand on-the-go.

A WORD FROM OUR CLIENTS

"The design is important to me and my customers. So are sustainable materials and the smart filling functionality."

Mathias Pilblad,
Meatballs for the People

"Duniform® trays have a quality look and feel. Our guests definitely appreciate them."

Manh Phan Hien,
owner of Zen Thai

"Duniform® bioplastic trays are a very good choice for us. They allow us to increase the number of sustainable products we use."

Magnus Lingvärn,
Head chef at the Mathildenberg kitchen

SERVED TO RAISE A SMILE

The best ideas are usually simple. Inspired by Asian bowls, the idea behind Duniform® Pearl containers is just that: unlike 'regular' trays, they come in an eye-catching deep plate shape. This ensures they stand out on the shelf and provide a winning dining experience.

As a result, they are ideal for encouraging impulse purchases and impressing customers. Available in a choice of formats that match natural eating behaviour, they come with transparent lids and also fit Duniform® machines, if you want a sealed solution.

PP/MINERAL DUNIFORM® PEARL

- Fits Duniform® machines DF15/25, DF32F to DF44*
- Choice of lids or sealing films
- Personalisable sealing films
- Precise cut around edge when sealed

Material: PP/MIN -20°C to +120°C

FILMS THAT PROMOTE YOUR BUSINESS

If you want to make your food look delicious, encourage impulse purchases and ensure a leak-free, secure fit, Duniform® films tick the boxes. You can choose between PP, PET and Universal films. These are crystal clear and can be specified to prevent fogging. Even better, we can personalise them for your business – making your packaging a powerful promotional tool.

In today's globalised world, there is a growing demand for individualisation. Customising films offers a simple, cost-effective way to meet this need – and build your brand. Our customisation team can organise this for you.

**MANUAL**

Simply lift and close the lid to seal your filled tray.

**SEMI-AUTOMATIC**

Place the filled tray in the cassette and the machine does the rest.

**FULLY-AUTOMATIC**

The machine winds the trays, and is capable of large volumes.

MACHINES

Duni offers a variety of machines in its Duniform® Sealing Concept. Whatever your requirements or budget, we are certain you will find the right sealing solution for your operation.

STANDARD SIZES, STANDOUT STYLE

Duniform® trays come in elegant 'straight to the table' formats to suit all types of frozen, chilled and warm food. They also offer a wide variety of GN compartment sizes, giving you full control over volumes, costs and end-user experience. The icing on the cake? They are designed for convenient stackability and transport too.

OPTIMISE
CONVENIENCE AND
COST-MANAGEMENT

1. Put the filled tray in the cassettes / machine.

2. Pull the film with two hands over the tray.

3. Push the lid of the machine down until it starts to seal.

4. The machine opens automatically once the tray is sealed (except manual machines DF10/15).

WHAT IS A CARBON FOOTPRINT?

Carbon footprint is used to describe the climate impact of a product over its entire life cycle. A calculation is made based on the type of material of the product, the energy used in manufacturing, transport, use phase and end-of-life handling.

The carbon footprint should be used with care since it is a simplified study of a complex reality. It does not describe the problem of plastics in the sea or use of chemicals and is dependent on facts like type of energy used and waste handling infrastructure.

A plant-based product may theoretically reach a zero carbon footprint when only renewable energy is used in the chain. A fossil-based plastic does not have this potential.

PRODUCTS

For packaging material the carbon footprint of the product is consistently lower than for the goods they protect. For plastic products, the transport is typically less than 10-15 % of the overall footprint, also when shipped from China to Europe.

Calculations show that for Duni products for the same use, bagasse and paper products have the lowest carbon footprint.

RESEARCH BASED

There are numerous studies that calculate the carbon footprint according to the ISO standard ISO 14044. There are databases to give the average findings of these studies. The numbers shown are calculated by an environmental consultant, Southpole.

Carbon dioxide emissions from a Duni product life cycle are typically divided into:

Raw materials manufacturing

Manufacturing of finished product

Transport of finished product

Product end-of-life

Recyclability of Duni materials:

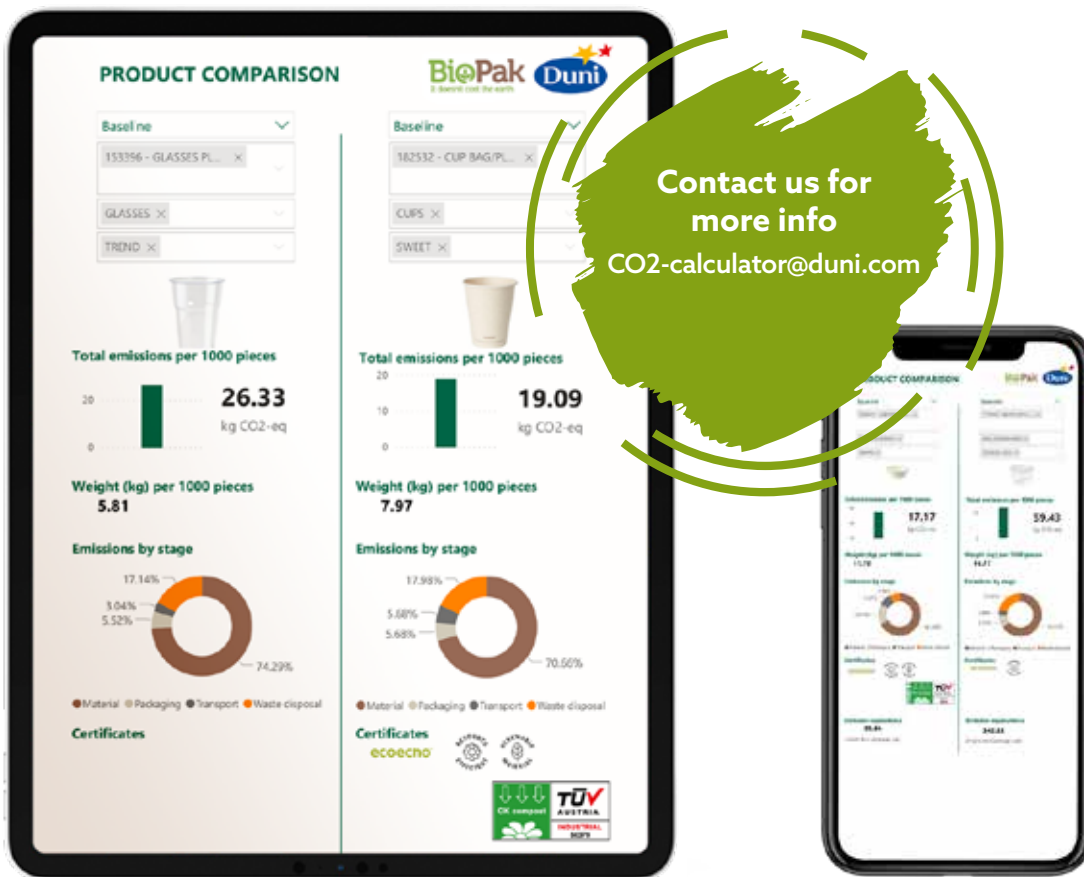

DISCOVER OUR NEW CARBON FOOTPRINT TOOL

For more than a decade we have been constantly improving our offer of more sustainable packaging, with the goal of lowering our carbon footprint. We are focused on the larger picture of a product's life cycle. Part of the focus will be on developing the material of the product, plant-based alternatives and resource efficiency, for example. The other part of the focus will be on different end-of-life options, composting is an example when it's a relevant alternative. We are constantly looking for new ways to improve and innovate the full life cycle of our products so that the beginning and end of the life cycle are in line with more sustainable solutions.

We help you with the calculation of your carbon footprint for your take-away packaging choice, also considering different end-of-life options depending on different recycling streams in your country.

THE LIFECYCLE OF A DUNI PRODUCT

The life of a Duni product starts with the choice of material. We prefer renewable raw materials from trees and plants, which are responsibly grown and sourced. Leftover materials such as sugarcane fibres or recycled plastics are also a great way to upcycle and save resources.

Conscious convenience is a good reason to choose and use Duni products. We work hard to ensure good working conditions and limited environmental impact at our own and our suppliers' manufacturing sites.

At the end of their life, Duni products should be recycled, composted or incinerated for energy efficiency. Littering is never an alternative and landfill should be avoided. We strive to enable good waste handling alternatives of our products.
