EU HIGH CHAIRS

Keep your child seated safely with TableCraft's EU Compliant High Chairs. This simple, yet contemporary design is available in three different colours to match any setting: white, natural & walnut finish. Durable, hardwood construction with washable replacement straps allows for easy cleaning with a damp cloth.

To ensure we are constantly exceeding the demands of the European legislation for our EU Compliant High Chairs, we have replaced our highchair straps to offer additional security by switching from a two point buckle to a stronger three point buckle.

To minimise any concerns, the new 67EU replacement straps are designed to fit the chairs without any additional assembly.

Our High Chairs comply with BS EN 14988:2006 Pt 1&2+A1:2012.

- Space saving, stackable design for easy storage
- Easy to clean with damp cloth, no food traps
- Adjustable 3-point waste strap harness
- Available in white, natural & walnut finish
- Pre-assembled or flat packed

Stainless Steel (Tri-Ply).....

Stainless Steel cookware is dishwasher-safe. However, we recommend hand-drying the cookware immediately after the rinse cycle or hand-washing and drying to preserve the original finish. Prolonged exposure to high heat settings may cause your cookware to discolour. To recondition your cookware or to remove stubborn spots and stains, use a nonabrasive pad and quality Stainless Steel cleanser such as Bar Keepers Friend®.

Cast Iron.....

Our line of Cast Iron is pre-seasoned, however it is still important to seal the surface of cast iron through a process called “seasoning”. This makes the cookware less likely to stick, protects it from corrosion and rust, and prevents food from taking on metallic flavours. With proper care, a well seasoned pan will only get better with time and last for several years. Wash the pan thoroughly in hot soapy water, then hand dry immediately. Using a cloth or paper towel, grease the pan thoroughly with a thin coating of vegetable oil or melted vegetable shortening. Be sure to coat the entire surface, including all corners. Heat the oven to 150°C. Place the cookware in the oven for 1 hour. Remove while hot and allow to cool to room temperature. Wipe away any excess oil, being careful not to scrub clean, then store. To preserve the seasoned finish, cast iron must be cleaned differently from other types of cookware. Cast Iron should never be placed inside a dishwasher or scrubbed with scouring pads or steel wool. Instead, wipe the pan clean with a sponge or dishcloth in hot water, without detergent. Any residue may be removed by boiling a little salt and vinegar in the pan, or by rubbing with a paper towel and coarse salt. Hand dry immediately after washing and brush with a thin coating of vegetable oil before storing. If stacking pans, place a paper towel between them. Pans should be seasoned from time to time when needed. Cast iron cookware is heavy and care should be taken when lifting; where available, use side handles for extra stability. Always use heat protection gloves as handles will become hot. Allow cookware to cool before cleaning. Cast Iron is not microwave safe.

Naturals.....

The “Naturals” are made of a food safe cast aluminium without coating and are NSF® approved. These items can endure temperatures from –28 up to 230°C. When using a non-caustic detergent, the product is dishwasher safe. Staining will occur if acidic foods are put into the natural products.

Coated Cast Aluminium.....

All Coated Cast Aluminium products are NSF® approved and will endure temperatures from –28 up to 100°C. (DO NOT BAKE in the coated cast aluminium products). If a defect in the coating appears, such as peeling or chipping, the product must be taken out of service immediately and repaired or replaced. The intended purpose of the colour coated products is for serving & display only. They are not to be used in the preparation of food. Some environmental uses are, but not limited to, buffet lines, catered environments, and in food display cases. Do not cut directly on the products, as this will cause the coating to scratch. Do not put any of the products in an oven, on a stove top, under a heat lamp or in any other condition where the temperature exceeds 100°C. Washing by hand is recommended, but when using a non-caustic detergent, the coating is dishwasher safe. Do not clean with scouring pads. Only use nylon or sponge pads. Regular dish washing will dull the coating. Do not use metal utensils on the colour coated products. NOTE: Staining of all colour coated products will occur especially if used with acidic foods. The lighter (white, ivory, sky blue, and grey) colours are more likely to show stains than darker colours. Staining of products is not covered under warranty.
