

CHANGE IS IN YOUR HANDS

European Assortment
2022:1

BiOPak
It doesn't cost the earth

A woman with long dark hair, wearing a bright blue jacket and a large red backpack, stands on a dark, rocky outcrop. She is looking out over a vast, misty landscape. In the background, there are jagged mountain peaks rising from a body of water, with thick white fog or mist filling the valleys between them. The sky is filled with soft, grey clouds, suggesting a dawn or dusk setting. The overall mood is one of solitude and contemplation.

BE THE CHANGE YOU DREAM OF

For everything to stay the same, everything must change. At BioPak, we aim to provide people with viable, sustainably designed packaging solutions, making it possible to preserve the planet and achieve commercial success at the same time.

BioPak
It doesn't cost the earth

PACKAGING THAT PUTS THE PLANET FIRST

We create packaging solutions with the circular economy in mind.

It starts with responsibly sourced materials, continues with environmentally certified manufacturing processes, and ends with disposal options that see resources reused or regenerated.

Let the change begin – it's in your hands.

GOOD FOR THE PLANET

When you choose BioPak packaging, you choose a brighter vision for the planet. We provide a broad range of recyclable solutions made from renewable, OK Compost-certified and FSC™-certified materials. Compared to conventional alternatives, these offer a lower carbon footprint and reduce the use of fossil-based plastic. Even better, they point the way to a more socially responsible world.

GOOD FOR BUSINESS

The circular economy can only become a reality if we, as a society, create business tools that are both viable and sustainable. At BioPak, we never lose sight of this fact. That's why every solution we offer combines environmental thinking with outstanding design, superior quality and proven materials. What's more, we match our packaging with services like our best-in-class profile print offer.

THERE IS NO PLANET B

OUR PRODUCTS

BioPak started life in Australia as a group of pioneers with a powerful vision: to make the best eco-conscious packaging on the market. Now part of Duni Group, we act as trusted partners to foodservice professionals across the globe.

As we push on with our mission, we comply with the ISO Environmental Standard and certify that most of our ranges are either home and/or industrially compostable.

For packaging material, the carbon footprint of the product is consistently lower than for the goods they protect. For plastic products, transportation typically represents less than 10–15 % of the overall footprint, also when shipped from China to Europe.

Calculations show that for BioPak products with the same use, sugarcane fibre and paper products have the lowest carbon footprint.

THE LIFECYCLE OF A BIOPAK PRODUCT

There is no Planet B. We never lose sight of this fact – which is why we carefully consider the lifecycle of everything we create.

We seek out the best plant-based materials in terms of functionality, resource-efficiency and environmental impact. Reflecting this, we offer a range of proven recycled, recyclable and compostable materials - many of which carry Ecolabels.

We also work hard to ensure that our products and services meet stringent environmental and social standards. Part of this process involves designing for the most responsible use of resources possible and auditing our suppliers.

If we, as a society, want to preserve and protect the planet, we need a world where end-of-life means new life. For that to happen, people need to be able to make more informed choices. And that's why, in addition to all of the efforts mentioned above, we've also created an innovative tool that makes it easier for people to choose optimal solutions based on end-of-life options in their region.

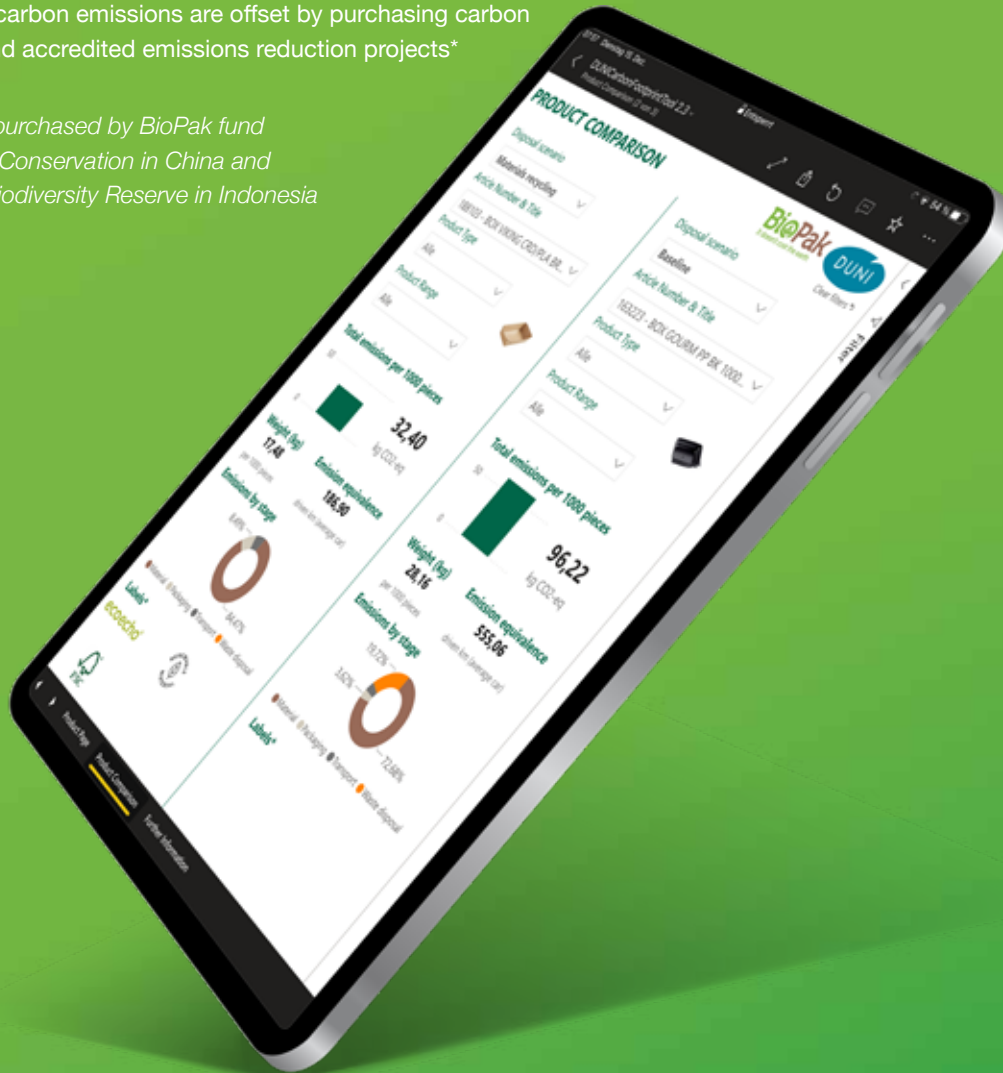

BIOPAK PRODUCTS NOW CARBON NEUTRAL

As of 2021, BioPak products are carbon neutral, meaning:

1. Each product's carbon footprint, measured across its entire life cycle, is calculated according to accepted guidelines, methods and data
2. The calculations are confirmed and certified by third-party experts
3. The product's carbon emissions are offset by purchasing carbon credits that fund accredited emissions reduction projects*

** Carbon credits purchased by BioPak fund the Jiangxi Forest Conservation in China and the Rimba Raya Biodiversity Reserve in Indonesia*

KNOW YOUR NUMBERS CUT YOUR FOOTPRINT

At BioPak we look forward to the day when comparing carbon footprint is as natural as counting calories or checking ingredients. In the meantime, our CO2-calculator, developed in collaboration with leading experts in the field of environmental calculations, is one way we're accelerating progress toward that goal. The tool enables you to:

- Compare the carbon footprint of different types of BioPak packaging
- Receive advice on end-of-life possibilities
- Minimize your environmental impact with confidence

Contact co2-calculator@duni.com to request a demo

RESPONSIBLY SOURCED MINDFUL MATERIALS

Our experienced design team uses responsibly sourced, high-quality materials. These work to ensure a smooth, reliable experience for workers and customers while minimising environmental impact.

Sugarcane Fibre/Bagasse

Rapidly renewable, compostable material also known as bagasse. By-product from sugarcane production with a low carbon footprint.

Paper/Paperboard/Cardboard

Compostable and recyclable as paper pulp if not contaminated by food. Most of our paper based products are made from FSC™-certified fibre.

Wood/Bamboo

A renewable resource. We use FSC-certified Birchwood and bamboo for our products.

Recycled PET (RPET)

Made from recycled plastic bottles. Recyclable in the same stream as PET.

PLA/CPLA

Compostable plant-based bioplastic made from fermented corn starch. Produced from surplus renewable material.

Grass Paper

Grass paper is recyclable and extremely resource-efficient. Grass is naturally abundant, available globally and harvested locally.

KNOW YOUR BIOPAK PACKAGING SYMBOLS

Disposal

Compostable

This symbol identifies packaging that is independently certified as either home or industrially compostable according to the standard EN 13432. Industrially compostable certified products will disintegrate within 84 days and biodegrade within 180 days in industrial composting conditions. Certified home compostable products will biodegrade within 365 days in home composting conditions. We list the certification standards and our unique certificate number.

Product materials

Responsibly sourced

To ensure our forests are protected forever, we only use raw materials from responsibly managed plantations, including FSC™-certified plantations.

Renewable material

To preserve the planet, we use renewable natural materials, which can be replenished as fast as they are used up.

Recycled material

To limit environmental impact, we use recycled materials. For instance, RPET is made from recycling plastic.

Customisable

To help you grow your brand, our experienced team is here to assist with profile printable products.

New product

To keep our customers ahead of the latest market trends, we keep creating eco-conscious new products. Look out for this symbol.

Product features

Stackable

To simplify service and save precious space, we offer a number of solutions that are designed for optimal stackability.

Microwave safe

To ensure you choose the best solution for your menu, we note which packaging is microwave safe.

Oven safe

To ensure you choose the best solution for your menu, we note which packaging is oven safe.

Sealable

Sealable to elevate hygiene and convenience. Suitable for sealing with a Duniiform® machine.

Antifog

To ensure delicious-looking displays and rewarding customer experiences, we offer a selection that resist condensation.

CERTIFICATIONS THAT INSPIRE CONFIDENCE

The products in our collection carry a variety of environmental and quality certifications. Here you can find out what they mean.

OK COMPOST INDUSTRIAL / SEEDLING

The OK Compost INDUSTRIAL label and the Seedling label indicate that the product is suitable for industrial composting and meets the stringent requirements of the European standard EN 13432.

OK COMPOST HOME / DIN-GEPRÜFT HOME COMPOSTABLE

The OK Compost HOME label and the DIN-Geprüft Home Compostable label indicate that the product can be composted at home, for instance by putting it on the compost heap in your garden.

THE FOREST STEWARDSHIP COUNCIL™ (FSC)

The Forest Stewardship Council™ (FSC) certification ensures the product is made of wood from forests managed in an environmentally appropriate, socially beneficial and economically viable manner.

NORDIC SWAN ECOLABEL

The Nordic Swan Ecolabel works to reduce the environmental impact from production and consumption of goods, with strict requirements in all relevant phases of a product's life cycle.

CUBE

Combining simplicity and functionality, Cube is a timeless classic. The square and rectangular shapes are perfect for efficient space utilization and the rounded edges add a sophisticated look. Made from renewable sugarcane fibre, the boxes can be either composted or recycled after use. Cube can be used safely with all types of hot and cold food and thanks to an extra secure lid closing, it ensures the best possible food protection. Transparent lids made from 100% post-consumer recycled PET (RPET) with an anti-fog feature to prevent condensation are available when clarity is a priority.

BRICK

With a material that signals sustainability and a range of trendy shapes, optimized for excellent stackability and maximal shelf space, Brick combines the most sought-after features on the market. Made from renewable FSC™-certified paperboard and a plant-based PLA bioplastic coating, it is perfect for dishes that require high fat and wet resistance. The boxes come with paperboard lids, transparent lids made from 100% post-consumer recycled PET (RPET) with an anti-fog feature to prevent condensation, but can also be sealed with our Duniform® concept.

RONDA

Like nature, the new Ronda take-away range comes in all shapes and sizes. The paper bowls and lids are FSC certified and compostable, and can also be recycled as paper after use. The optional transparent lids are made from 100% post-consumer recycled PET (RPET), and can be recycled again after use.

GLASSES & STRAWS

CRYSTAL

Crystal glasses give new life to what otherwise would have been waste. They are made from 100% RPET. Even better, they are crystal clear – making everything they contain look delicious – and very flexible. To top it all, you can seal them with a Duniiform® DF5 machine to maximise hygiene and prolong shelf-life.

HMR FIBRE

The HMR Fibre range is a great sustainable addition to our Duniform® sealing concept. By keeping the classic HMR design, we've made it super easy to make the switch to a more eco-conscious alternative. Made from renewable and compostable sugarcane fibre and a thin plastic lamination, the trays contain 90% less plastic than conventional plastic trays. Even better, they come without any added PFAS. Perfect for all kinds of hot and cold food, they provide excellent grease and water resistance. If not sealed, they can be used with a sugarcane fibre lid instead.
